OMPRAKASH PANNEM

Technical Lead - DevOps Engineer
Email: pannem.omprakash@gmail.com | Phone: +91-8374056509

PROFESSIONAL SUMMARY: DevOps Technical Lead with 9+ years of experience designing, building, and operating cloud-native platforms for large-scale distributed systems. Strong expertise in Kubernetes, AWS cloud infrastructure, CI/CD automation, Infrastructure as Code, and observability platforms.

Proven ability to improve engineering productivity and system reliability by implementing automated DevOps pipelines, scalable Kubernetes platforms, and cloud-native architectures. Successfully reduced deployment time by 65%, infrastructure costs by 30%, and debugging effort by 50% through automation, monitoring, and operational improvements.

Hands-on experience implementing GitOps deployment models, DevSecOps practices, progressive deployment strategies, and Site Reliability Engineering principles. Known for building reliable infrastructure, mentoring DevOps teams, and enabling development teams with self-service deployment platforms.

CORE SKILLS

Cloud Platforms
AWS, Azure, GCP

Containers & Orchestration
Docker, Kubernetes, Helm, kOps

Infrastructure as Code
Terraform, AWS CloudFormation

CI/CD & Automation
Jenkins, GitHub Actions, GitLab CI, Bamboo, SonarQube

GitOps
ArgoCD, FluxCD

Configuration Management
Ansible

Observability & Monitoring
Prometheus, Grafana, Datadog, CloudWatch, ELK Stack, Fluentd, OpenTelemetry

DevSecOps & Container Security
Trivy, Snyk, OWASP Dependency Check, Falco

Chaos Engineering
AWS Fault Injection Simulator, Gremlin, Chaos Toolkit

Messaging & Streaming
Apache Kafka, Zookeeper

Kubernetes Security
RBAC, Network Policies, Pod Security Policies

Deployment Strategies
Blue-Green Deployments, Canary Releases

Site Reliability Engineering
SLI, SLO, Error Budgets, Incident Response

Databases
MySQL, PostgreSQL, Amazon RDS

Operating Systems
Linux (Ubuntu, CentOS, RHEL), Windows Server

Scripting
Python, Shell

Collaboration Tools
JIRA, Confluence, ServiceNow

DEVOPS PLATFORM & ARCHITECTURE EXPERIENCE

Designed and implemented scalable DevOps platforms enabling automated build, deployment, and monitoring for microservices applications running on Kubernetes and AWS infrastructure.

Typical deployment architecture:

Developer Commit
→ GitHub / Bitbucket
→ CI Pipeline (Jenkins / GitHub Actions)
→ Docker Image Build
→ Artifact Repository (Nexus / Artifactory)
→ GitOps Repository
→ ArgoCD
→ Kubernetes Cluster
→ Prometheus & Grafana Monitoring

Key outcomes from platform initiatives:

• Enabled automated CI/CD pipelines supporting **200+ deployments per month**
• Standardized build and deployment workflows across engineering teams
• Implemented GitOps-based Kubernetes deployments using **ArgoCD**
• Integrated DevSecOps scanning in CI/CD pipelines

• Enabled **Blue-Green and Canary deployments** for production releases
• Implemented centralized monitoring and alerting for microservices platforms

PROFESSIONAL EXPERIENCE

ZENOSYS SERVICES — Ahmedabad (Remote)

DevOps Lead Engineer
Oct 2023 – Dec 2024

Designed and managed DevOps platforms supporting containerized microservices deployed on Kubernetes and AWS.

• Built automated CI/CD pipelines using **Jenkins**, reducing deployment time by **65%** and increasing release frequency

• Containerized microservices using **Docker** and deployed them to Kubernetes clusters using Helm charts

• Implemented **GitOps workflows using ArgoCD**, enabling automated synchronization between Git repositories and Kubernetes clusters

• Developed Helm-based deployment frameworks reducing application deployment time from **45 minutes to 8 minutes**

• Implemented **Blue-Green and Canary deployment strategies** enabling zero-downtime application releases

• Enforced Kubernetes security policies using **RBAC and network policies**

• Designed AWS infrastructure using **EC2, RDS, S3, IAM, VPC, and EBS**

• Automated infrastructure provisioning using **Terraform and AWS CloudFormation**

• Integrated **DevSecOps security scanning using Trivy and Snyk**

• Implemented distributed tracing using **OpenTelemetry and AWS X-Ray**

• Built monitoring dashboards using **Prometheus, Grafana, and CloudWatch**

• Reduced mean time to detect production issues by **40%**

• Implemented **Apache Kafka event streaming pipelines** supporting real-time data processing

• Designed internal deployment workflows enabling **self-service application deployments for development teams**

• Mentored DevOps engineers and conducted internal training on Kubernetes, CI/CD, and infrastructure automation

---

AERIES TECHNOLOGIES — Bangalore

DevOps Technical Lead
Mar 2023 – Jun 2023

• Designed serverless cloud solutions using **AWS Lambda**

• Automated infrastructure provisioning using **Terraform and CloudFormation**

• Implemented centralized monitoring and logging using **ELK Stack and CloudWatch**

• Configured secure networking using **AWS VPC, VPN, security groups, and NACLs**

• Built operational dashboards using **Amazon QuickSight**

• Implemented cloud cost optimization initiatives reducing monthly spend by **20%**

• Led DevOps initiatives to improve system reliability and operational automation

---

JOULESTOWATT — Bangalore

Senior DevOps Engineer
Jul 2018 – Dec 2022

• Built enterprise CI/CD pipelines using **Jenkins** supporting **150+ daily builds**

• Implemented infrastructure automation using **Terraform**, reducing provisioning time from **3 days to 2 hours**

• Implemented **JFrog Artifactory** as centralized artifact repository for multiple engineering teams

• Standardized CI/CD workflows across **30+ microservices**

• Automated operational tasks saving **20+ hours of manual work weekly**

• Delivered DevOps training sessions improving developer productivity and platform adoption

---

HCL TECHNOLOGIES — Noida

DevOps Engineer
Apr 2015 – Oct 2017

• Built CI/CD pipelines using **Bamboo and Bitbucket**

• Containerized applications using **Docker**

- Implemented Kubernetes deployments improving scalability and reliability
- Designed AWS infrastructure supporting **50,000+ daily users**
- Implemented **Terraform Infrastructure as Code** for cloud resources
- Built auto-scaling infrastructure handling **300% traffic spikes**

TECHNOLOGY IMPACT

- Reduced deployment time by **65% through CI/CD automation**
- Reduced infrastructure costs by **30% through cloud optimization**
- Improved system observability reducing debugging time by **50%**
- Enabled **200+ deployments per month** across engineering teams
- Maintained **99.95% uptime** for production services

EDUCATION & CERTIFICATION

Bachelor of Technology in Computer Science and Engineering – Savitribai Phule Pune University, 2004
Certified Scrum Master (CSM) – Scrum Alliance, Jan 2025
